### Wholesale Weekly Availability (PDF Display Logic)

- When clicking **Wholesale Weekly Availability**, the corresponding PDF should automatically display (no download or extra clicks required).
- Later, the pricing will be **hidden by default**.
- There will be a **code input field** with the following behavior:
  - **Input Field:** Customers enter a code (initial code: 22).
  - **On Code Entry:** The pricing-enabled Excel and PDF will become visible for download/view.

## Wholesale Login Behavior

- When a **wholesale customer logs in**, they should be able to access:
    - Weekly Availability PDF (with pricing)
    - Pricing Excel file (detailed)
- 

## Wholesale Order Form Design

### Table Fields:

Product Name	Quantity	Size	Isle #	Price	Total
--------------	----------	------	--------	-------	-------

- **Functionality:**
    - The wholesale customer will **fill in the 'Quantity'** for each product.
    - Once submitted, the order will be sent to the admin/warehouse for processing.
    - Based on this, the internal team will **review and process deliveries**.
- 

## Future Considerations:

- Add feature to upload availability sheet weekly.
- Admin panel functionality to:
  - Upload PDFs/Excels.
  - Set/update the access code (22 now, but editable).
- Possible audit log for wholesale access and downloads.
